DEPARTMENT OF PHARMACEUTICAL ENGINEERING

REPORT ON

VISIT TO VINAYAKA MISSIONS MEDICAL COLLEGE, KARAİKAL

The department of Pharmaceutical Engineering have arranged for a visit to Vinayaka Mission's Medical College, Karaikal on 31/3/2023. Exposure to medical college will help the students to know about the use of drug in treating disease and can also bridge the gap between the two disciplines. This knowledge will help the students in designing effective drug delivery systems, drug formulations and clinical trials.

The field trip included visits at the VMCC's pharmacology lab, physiology lab, anatomage table, and animal house. Both students and staff gained something novel during the visit, and there are several insights that may be implemented in the department.

The students found the Anatomage table to be a visual treat and were extremely eager to explore the anatomy layer by layer and the physiology of a few organs. We also had the chance to attempt the procedure.

HANDS ON TRAINING

VISIT

ANIMAL HOUSE

The trip came to an end with a beach visit for relaxation.
