EI RFID Solutions Private Limited Formerly Electron India offers a wide range of products that serve a host of industrial applications in RFID, Biometrics, and Contract manufacturing solutions. EI RFID was started from the need to solve problems in our chosen domain. It's our mission to provide innovative solutions to the challenges faced by our customers to their satisfaction.

As Biomedical Engineering Students, they need to know about the different industries, to keep themselves updated about how they function, how they manage their business operations, how they manufacture and promote them, how they identify and meet their customers' needs and demand, etc., the Industrial visit serves as an easy means to Understand all this.

It was a great experience in EI RFID Private Limited, where our students were welcomed by the unit HR Team. They explained the History of the Company and its Achievements, companies Vision, Mission, and Technologies. The students were instructed clearly about the safety measures to be followed in the floor area, and then taken to the live plant operation area. They elaborately explained the RFID principles and also about the QR Code system developed by them in Chennai Metro.

Finally, the Technical Team clarified the queries raised by our students and with delivering the vote of thanks, our visit came to an end.
