

Environmental Students Club

Report on World Ozone Day 2023

AVIT Environmental Students Club organized World Ozone day 2023 on 15.09.2023 at the Digital Classroom. A quiz competition was held under the theme of “Montreal Protocol: Fixing the ozone layer and reducing the climatic change”. More than 100 students registered for the quiz competition and they participated actively in it. The quiz competition was divided into two rounds namely written quiz round and crossword puzzle respectively. In the first written quiz round, 106 students enthusiastically took part and the first 30 students were selected for the crossword puzzle round. The first 3 winners from the last round were given prizes and along with certificates. The first 30 selected participants were also awarded with certificates. Through this quiz competition, the students were given awareness about the importance of the ozone layer and how it is useful to humans and the environment. They also were educated about how to save the depleting ozone layer and the measures that can be taken to reduce the rate of its depletion.
